General information

Goal

• To up date information on acquired results within the on going ESF project „The Development of Teachers' Professional Competence within Interdisciplinary Study Environment for Linking Learning to Real Life and Promoting Students' Entrepreneurship”.

Methodology

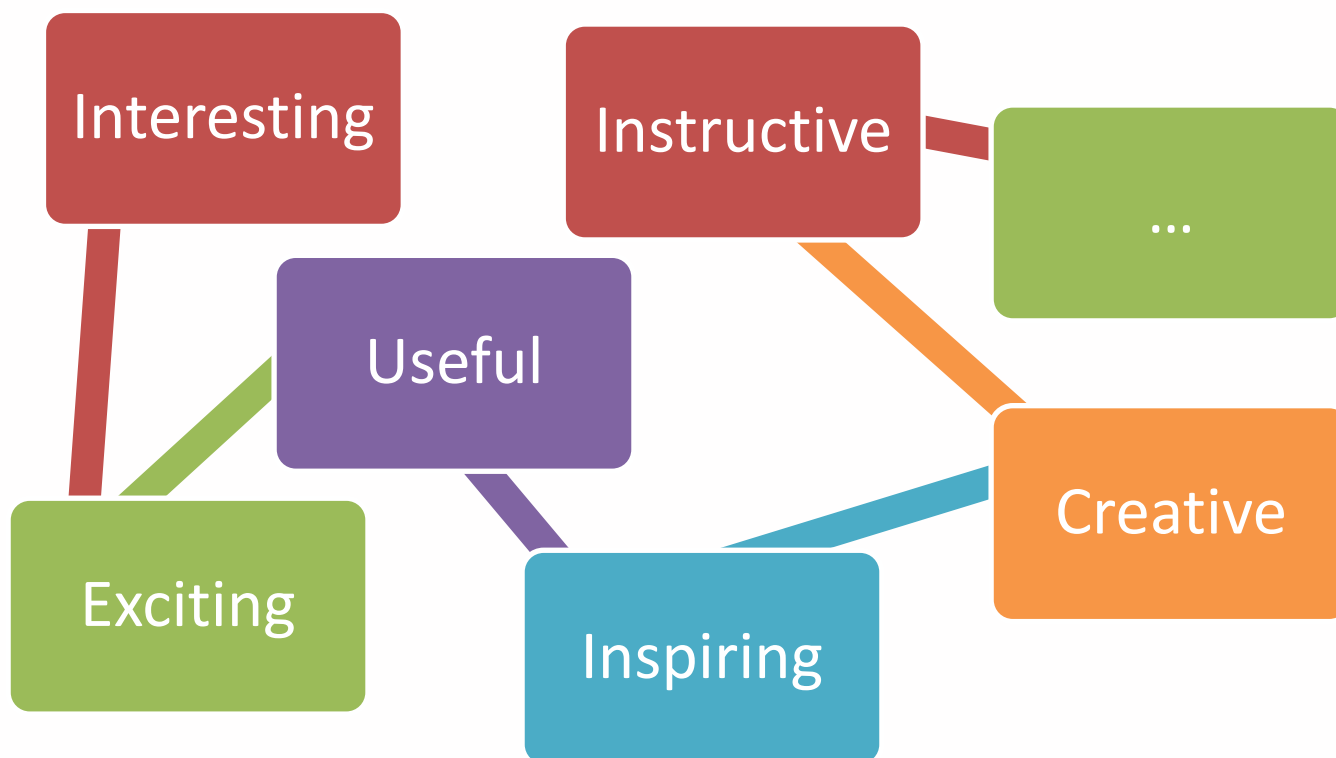

- Focusgroup discussions (*qualitat.research.method*) on acquired competences,
- Interactive tasks to promote cooperation and mutual communication;
- Application of electronic voting device (*quantitat.research method.*) both to obtain data and enrich experience on teaching tools

FGD

Focusgroup discussions summarised:

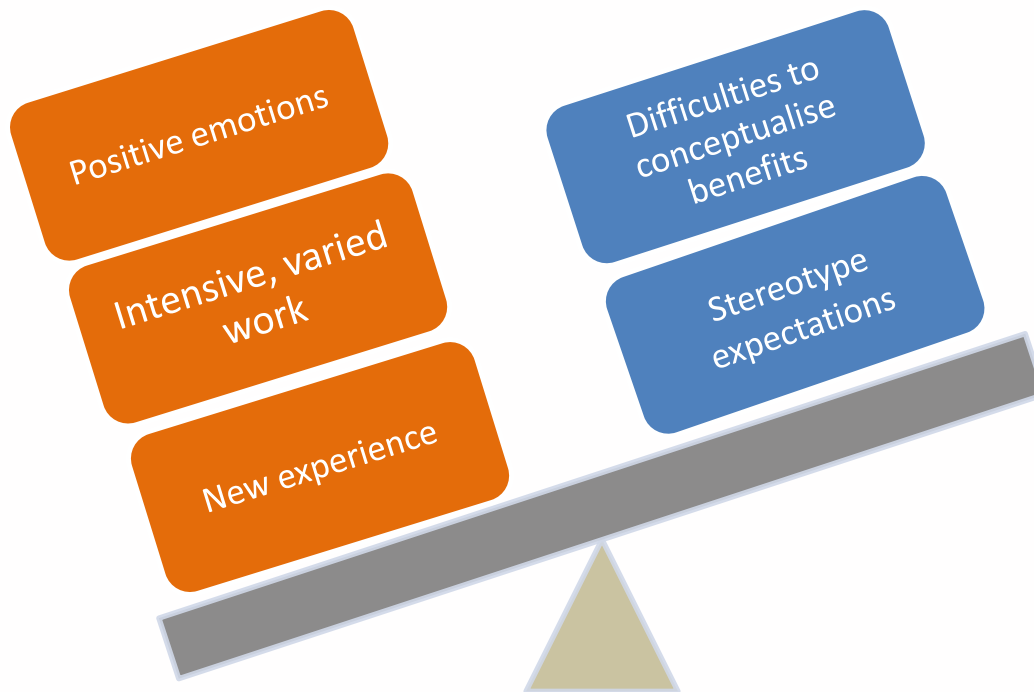

- **Opinions of teachers about motivation;**
- **Microgroup opinions on benefits from project for students and educational process;**
- **Opinions of teachers of further activities in the project**

Keywords used in evaluation...

Pros

Cons
